Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed November 7, 2001.

Claims 7-16 and 21-24 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recitation in claim 21 that the second portion of the pin is "adapted for prohibiting flow" is inaccurate in that it is the O-ring that seals against flow. The claims are thus considered to be indefinite.

Claims 7-16 and 21-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description of a portion of the pin 5 sealing the aperture of the valve seat, as is now claimed. This is a new matter rejection.

The action on the merits of the claims hereafter is made to the extent that the claims are understood.

Subject matter in the claims which is indefinite, ie. that is subject to more than one interpretation, is given that interpretation which renders it subject to rejection on the prior art, provided that the issues involved can be reasonably understood. Grammatical and typographical errors and recitations

Art Unit: 3753

without proper antecedent basis of a minor nature, such as the addition or omission of an adjectival modifier, will be interpreted as if they had been corrected, provided that the correction is reasonably apparent.

Claims which are not treated on their merits hereafter are deemed to be so informal as to preclude a reasonable comparison to the Prior Art in that the meaning of the terms of the claims and thus the content and scope of the claims cannot be determined with a reasonable degree of certainty.

This will be the case where the claims include subject matter which is more seriously indefinite, unclear or inadequately supported. For example, where an indefinite recitation is compounded by reference to another indefinite recitation, where there is a multiplicity of indefinite recitations, where there are numerous and repetitive formal errors or where the essential distinguishing feature or features of the invention, ie. the point of novelty, is indefinite, it would require considerable speculation to arrive at a determination of the scope and content of the claim.

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
